# Corporate Statement of Qualifications

---

———— *Plug In and Power Up* ————

———— *Plug In and Power Up* ————

**Our vision** is simple. *We want to be the best solar installation company possible.*

With over 15 years of experience, **Kuykendall Solar** is uniquely qualified to handle your project. Not only do we understand your needs but we can meet them efficiently and at a competitive price. We are fully equipped and capable of installing residential and commercial projects throughout the State of California.

**Our focus** is simple. *Do the job we are contracted for on time and under budget.*

Here is how we accomplish this.

- Our employees are seasoned installation professionals who are capable of meeting our industry leading standards. We grow their skills by paying them to participate in related industry training and education. Background and drug testing are mandatory.
- Our crews are cross trained in every aspect of installation, this promotes flexibility and eliminates downtime.
- We do not have a traditional sales department, our business grows primarily by word of mouth. We have eliminated the need for sales managers, telemarketers, canvassers and the expense of radio and TV advertising. This allows us to pass that savings on to you.

**Our objectives** are simple.

- Offer our services to you at the best price point possible.
- Deliver on our promise of quality, efficiency and thoroughness.
- Consistently review and evaluate every job for accuracy and cost control
- Surpass industry standards through safety training and electrical education

---

Serving the California market since 2000

————— *Plug In and Power Up* —————

**Kuykendall Solar** offers the following services to our customers:

**Direct Installation:** As a “Turn-Key” solar project developer, we help our customers save thousands of dollars by reducing their energy costs. We believe in solar and we know that it is a better alternative than traditional utility power. We help you take control of your energy costs and protect you from price increases by your local utility company.

**Contracted Services:** Kuykendall Solar’s efficiency, quality control and pricing have not gone unnoticed in the industry. Because of our ability to deliver projects on time and under budget we are consistently asked to subcontract for other companies. Our contracted services division therefore offers a full service menu of options to project developers to assist them in getting their projects done. These contracted service relationships span over many years with multiple projects completed and in the pipeline.

## Staff & Contact Information

### Our Staff

We pride ourselves on the knowledge and experience of our crews. We require all of our employees to complete the OSHA 30 safety class as well as First Aid and CPR training. All of our project managers, superintendents and electricians have their CA certification cards. Each job has a fall protection plan outlined on site, and each superintendent is provided with a safety folder and is required to conduct safety meetings at the beginning of each work week. These safety meetings are mandatory and the sign-in sheet and meeting notes are reviewed by the company President at the end of each week. We strive to consider all possible risks and then mitigate them before they arise.

When the project size dictates the need for contracted labor we only partner with the most reputable labor companies such as Labor Max; who perform background checks on their employees, and who cover all liability and worker's comp coverage and claims.

- Cloverdale Dairy, Hanford CA, 875kW
- Wrenden Ranch, Hanford, 1.2MW
- Doreva Produce, Livingston CA, 216kW

# Letter of Recommendation

(Additional letters upon request)

Letter of recommendation for Kuykendall Solar,

My name is Sirath Patzer and I have been the DSA inspector on three different commercial rooftop projects that Kuykendall solar has installed in Southern California.

The jobs were:

Santiago Elementary School DSA A# 04-111080, File# 30-48

South Lake Middle School DSA A# 04-111096, File# 30-48

University High School DSA A# 04-111021, File# 30-48

I was very impressed with the quality and workmanship of Mr. Kuykendall and the crews he had on site at every job I had the pleasure of working with them on.

Their inspections were always seamless and his installations far above code. In relation to the above mentioned jobs, Kuykendall Solar never missed or failed an inspection, and always completed projects earlier than anticipated.

I highly recommend using Kuykendall Solar as your commercial solar installer.

Everyone that has worked with them has come away happy with the quality of the install and has enjoyed working with Brian and his crews. Feel free to call if you have any questions.

Thank you,

Sirath Patzer
