

SETTING THE STANDARD

Experience

- Since 1995, Sundance has set the standard as the leading renewable energy company in the region for both residential and commercial customers.
- Our highly skilled teams have installed over 1,000 systems, specializing in residential and commercial solar electric, solar hot water, radiant floor heating, wind, hydro-electric systems, off-grid and battery back-up.
- Our unmatched service department ensures long term maintenance and optimal performance of our systems.

Qualifications

- We are fully licensed in plumbing, heating and electrical and hold an unlimited general contracting license.
- Many of our sales, design, and field staff are NABCEP Certified staff, the gold standard for solar professionals.
- Sundance is a proud member of the Amicus Cooperative, a collective of 40+ businesses that leverages technical knowledge, business acumen, and collective buying power.
- Since 2011, we have been consistently voted the #1 Alternative Energy company in the MountainXpress Best of WNC poll.
- Sundance is a Living Wage Certified Employer and a HUB-Certified Woman-owned Business.

Commitment

- We are firmly rooted in our community and participate in numerous outreach and educational events.
- We helped found the Alliance for Energy Democracy to advocate for a locally owned, democratic energy system.
- As stakeholders, we work at the regional and state levels on energy policy, sitting on the WNC Energy Innovation Task Force and advocating for rooftop solar with the NC Sustainable Energy Association.
- Our office is carbon-positive with on-site renewable energy systems, including two solar electric arrays, solar hot water, a biomass boiler, and radiant floor heating.
- We embrace the triple bottom line business approach to prioritize People, Planet, and Profits.
