Pika Energy Island
Powered by Panasonic Li-ion technology

Pika's Harbor smart batteries are powered by Panasonic's world class Li-ion technology.

Made in the USA
Pika Energy Island Key Specifications

With a Pika Energy Island, you don’t have to sacrifice your lifestyle during grid interruptions or peak-rate periods. Up to 17.1kWh of storage per battery and up to 12.0kW of output per system make the Pika Energy Island more powerful than any other solar plus storage solution on the market. A single Pika Islanding Inverter can control multiple batteries and solar arrays, allowing you to add even more power and capacity to your system.

- Up to 17.1kWh of storage per smart battery keeps your home powered by solar 24/7
- Intelligent system modes manage your energy costs automatically
- Up to 12.0kW of backup power keeps AC, well-pumps, lights and refrigerators running
- Connect multiple batteries to a single inverter for the ultimate backup system

Pika’s Harbor smart batteries are powered by Panasonic’s world class Li-ion technology.

**Power you need**

Harbor Plus™ has enough capacity to power most homes through the night and into the next morning. When sunlight is available, the battery will recharge automatically. Energy Island can power a home for days or weeks in this way.

Visit [www.pika-energy.com](http://www.pika-energy.com)
The Pika Energy Island is your energy ally, keeping your home powered by 100% clean solar energy, even when the grid goes down. Everything is seamlessly connected using our REbus™ platform, which uses patented intelligence to reduce your energy costs and increase your energy security.

Always on, always clean
Sleep easy knowing that your Pika system is always ready to protect you and your family from grid failures, instantly and automatically.

Get to 100% renewable power with a Pika Energy Island. Solar energy produced by your system is stored in a smart battery, available day and night.

Own your future
The future of home energy is technology, not fuel. Take charge with a clean, intelligent alternative to the grid, without cutting the cord.

With an Energy Island at home, you’re in control of your energy future.
 Silent backup power
Reliable, long-lasting and totally automatic

Enjoy more power for longer periods of time than other home batteries can offer, allowing you to power the things you really need, plus a few of the things you don’t. Pika has the power to keep your home up and running, even when the grid is down.

Opt-out of power outages

When others lose power, you won’t. Energy Island automatically protects you from grid outages. Our system is so fast to respond that you might not realize the grid is down until the neighbors call.

Think beyond the generator

The Pika Energy Island delivers big backup power and never runs out of fuel. Enjoy instant, quiet and clean power during extended outages. This is self-sufficiency at its best.

“Thousands of families, like mine, lost power in the wake of Hurricane Maria. Thanks to our Pika Energy Island, we were able to keep our food fresh, lights on and air conditioning at the same time for days and weeks. The confidence of having energy thanks to the Pika Energy Island is priceless, my family and I are very happy.”

- Nelson Figueroa, Pika Energy Island owner, Puerto Rico
Love your power
Insight and connectivity, from Pika REview™

Monitor your clean energy system on the go with the REview Dashboard. Included free with every Energy Island system, REview provides at-a-glance updates on your clean energy production and deep dives to view the performance of individual devices.

REview is optimized for mobile, so wherever you go – REview is there, on all of your devices.
