# Overview

Community Solar Farms, also referred to as shared renewables, are solar arrays that generate electricity for multiple households on the same, perfect site. Everyone who pays an electricity bill can now take advantage of solar power and save money, without installing solar panels on their roof or property.

---

## Solar Farm 1

Enfield, NY

222.65 kW with 725 solar panels on 1.57 Acres serving 23 households

## Solar Farm 2

Enfield, NY
