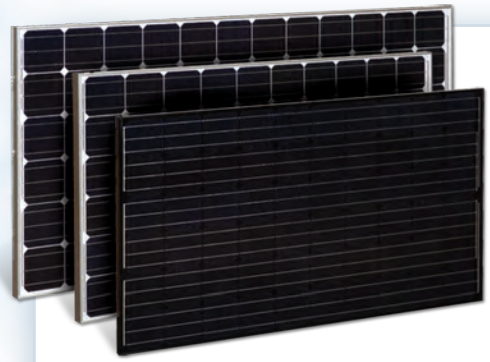
Suniva®
The Brilliance of Solar Made Sensible®

CELEBRATING 9 YEARS
as AMERICA'S LEADING SOLAR MANUFACTURER

AMERICAN MADE



Optimus® Series
monocrystalline solar modules

- Delivers over 17% efficiency
- Utilizes our premier American cell technology, ARTisun Select®
- 290 W (60 cell); 340 W (72 cell)
- 1000V UL, silver and black frame available
- 25 year linear power warranty;
  10 year warranty on workmanship and materials
- Made in North America
- Superior performance and reliability;
  enhanced stress tests conducted at Fraunhofer ISE
- Positive only power tolerance (silver frame)
- Passed most stringent salt spray tests
- Certified PID-free
- Qualifies for Ex-Im Financing

ARTisun Select®
monocrystalline solar cells

Suniva's high-efficiency solar cells, made in the USA using proprietary cost-effective manufacturing techniques, average over 19%.

GLOBAL APPLICATIONS INCLUDE

MANUFACTURED IN
Georgia & Michigan

AN AMERICAN SUCCESS STORY

WHO WE ARE

Headquartered in metro-Atlanta, Georgia, Suniva is America's leading manufacturer of high-efficiency crystalline silicon photovoltaic (PV) solar cells and modules. Suniva is advancing solar technology by using proprietary processing techniques that optimize each step of production to achieve higher performance than other solar offerings. Suniva's products are fully Buy American-compliant, consisting of over 80% US content and qualify for Export-Import (Ex-Im) financing.

HOW WE STARTED

Suniva evolved from the work of Dr. Ajeet Rohatgi in 2007. Dr. Rohatgi is regarded as one of the world's leading research scientists in PV technology. He is currently a Regent's Professor and a John H. Weitnauer, Jr. Chair in the College of Engineering at the Georgia Institute of Technology. Dr. Rohatgi joined Georgia Tech's faculty in 1985, and is the founding director of the school's University Center of Excellence for Photovoltaic Research and Education (UCEP)—one of the world's leading PV research institutes, funded by the US Department of Energy. Dr Rohatgi also serves as the founder and CTO of Suniva, Inc.

OUR GROWTH

Our rich research heritage has resulted in the development of ground-breaking technologies for PV manufacturing, such as Ion Implantation, and cell and module efficiencies that will average over 20.5% and 17.5% in 2015, all while lowering costs to levels that rival manufacturing found anywhere in the world today. Since our inception, our production capacity has grown to over 400MW, including our latest expansion – our new module manufacturing facility in Saginaw, Michigan, adding an additional 150 new jobs.

TODAY

We've grown to become America's leading solar manufacturer, with customers around the world. Our partners include over 400 companies world-wide, including four of North America's largest electrical and solar distributors, many of the worlds' leading EPC's, and Fortune 500 companies that self-perform their own solar installations. Suniva products are used in applications that serve a wide range of customers: from private residences, commercial and industrial rooftops, to cellphone towers, utility solar fields, and US government and military installations at home and abroad. The marketplace continues to value our focus on growing conversion efficiencies in cost-responsible, high-quality PV products—our strategy of "solar made sensible". Come find out why. You can start by visiting us at www.suniva.com.
